

Altasciences is a forward-thinking, mid-size contract research organization offering pharmaceutical and biotechnology companies a proven, flexible approach from lead candidate selection to clinical proof of concept.

Helping sponsors get better drugs to the people who need them, **faster.**

25+ years of expertise

FULLY INTEGRATED Service Offering

PRECLINICAL

PHASE I AND II

PHASE III TO COMMERCIAL

PRECLINICAL SERVICES

- Full range of *in vivo* GLP and non-GLP safety evaluation studies, for large and small molecules
- Expertise across multiple routes of administration
- Experience with both rodent and non-rodent species
- First-class commitment to quality and animal welfare

CLINICAL SERVICES

- Dynamic capabilities across many therapeutic areas, in small and large molecules
- Experience conducting clinical pharmacology studies and NDA-enabling trials in both healthy normal, patients, and special populations

MANUFACTURING AND ANALYTICAL SERVICES

- Small molecules
- Services that include formulation development, Phase I through commercial manufacturing, and ICH stability testing

BIOANALYTICAL LABS

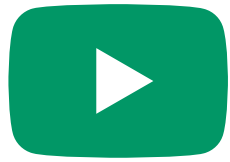

- Leading scientific researchers with 20+ years of experience in method development for small and large molecules
- Testing expertise with mass spectrometry, ligand binding or hybrid assays with innovative, cutting-edge techniques to accelerate drug development and produce reliable results from preclinical, to clinical, to Phase IV

RESEARCH SERVICES

- Dedicated program manager supports your study as it advances, creating unique customized solutions, and maximizing speed and efficiency
- Clinical research services include scientific, regulatory, and strategic guidance, protocol development, project management, data management, biostatistics, reporting, medical writing, CDISC, and archiving
- Research services with a preclinical focus include analytical biology and chemistry, immunohistochemistry, PK/TK data analysis, specialized necropsies, anatomic and clinical pathology, and SEND

Our integrated, full-service solutions are all customizable to specific sponsor requirements. Seamless integration is achieved through proactive internal and external communication, ensuring that you will not need to repeat the same information twice - **Tell Us Once™**, and we'll take care of the rest.

MOVING IN UNISON TO DELIVER BIG IMPACT WITH A PERSONAL TOUCH

5 LOCATIONS IN NORTH AMERICA

PRECLINICAL AND BIOANALYTICAL FACILITY

Seattle, U.S.A.

- 140,000-square-foot facility, 140 animal rooms, including European housing
- Over 2,400 safety studies conducted to date

CLINICAL FACILITIES

Montréal, Canada
Kansas City, U.S.A.

- 400 beds (265 in Montreal, Canada and 140 in Kansas City, U.S.A.)
- Over 250 clinical trials conducted annually

MANUFACTURING AND ANALYTICAL

Harleysville, Pennsylvania

- 30,000-square-foot, GMP-compliant small molecule CDMO facility
- Analytical labs with advanced technology servicing non-sterile development and dosage forms; available terminal sterilization

BIOANALYSIS AND RESEARCH SERVICES

Laval, Canada

- Over 200 dedicated scientific experts
- State-of-the-art laboratories supporting LC-MS and ligand binding capabilities
