

PROJECT MANAGEMENT

With Altasciences, your molecule advances seamlessly from preclinical testing through early-phase clinical studies. Our tailored strategy integrates bioanalytical services, preclinical safety evaluation, formulation development, clinic-ready manufacturing, and clinical testing through proof-of-concept.

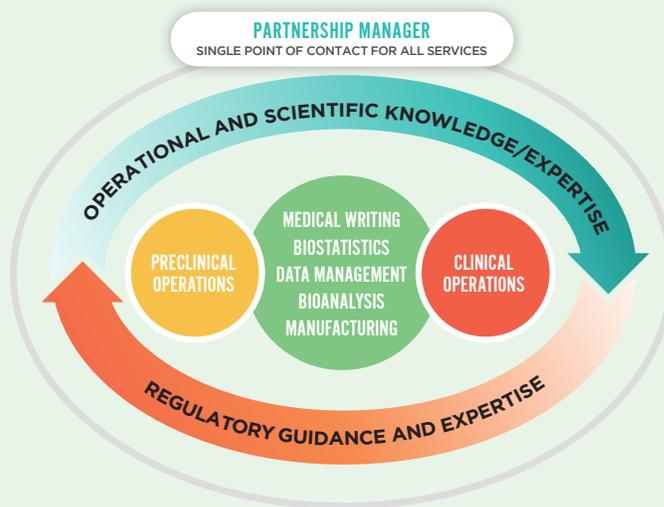

No matter the scope—preclinical, clinical, bioanalytical, or CDMO—your program is led by one of our versatile, highly experienced project managers (PMs). Working within this fast-paced, interconnected environment, our PMs anticipate challenges, connect critical insights, and de-risk your program with a proactive approach to planning and execution.

With a single PM guiding development, activities run in parallel, rather than sequentially, saving you time and cost.

Your dedicated Altasciences program manager:

- **Provides** you with a centralized point of contact to improve speed and efficiency.
- **Manages** your study timelines proactively.
- **Leverages** our team of experts to review your emerging data and support your needs.
- **Responds** to your program challenges with solutions, in real time.
- **Shares** all your information across departments proactively, so you only have to Tell Us Once™.

When your program spans multiple service areas, a **strategic partnership manager** provides cross-functional oversight to guide its progress.

Shifting to a Program Model

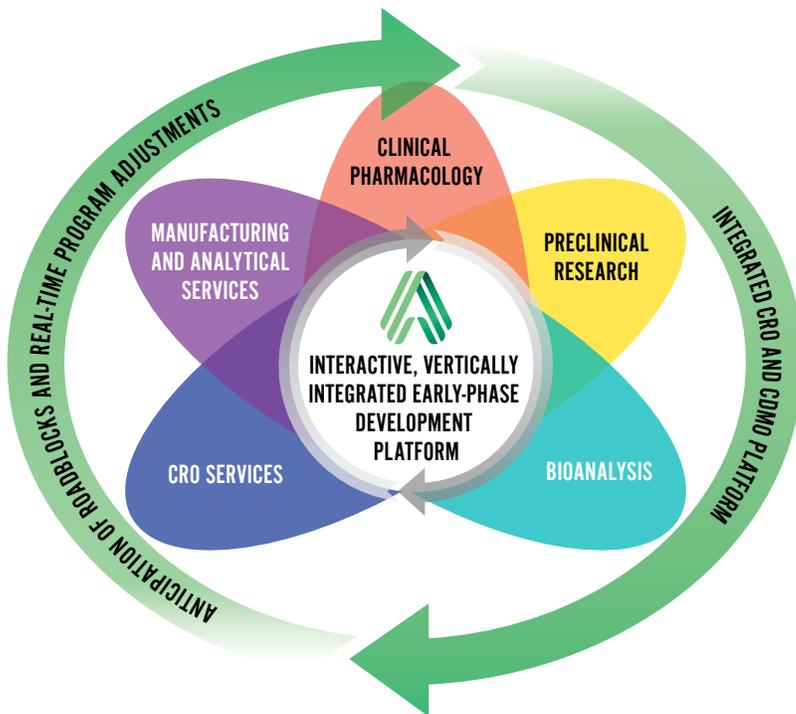

Our program management model enables a seamless drug development experience with a single CRO/CDMO, resulting in increased efficiencies for your entire program.

	PROJECT	PACKAGE	PROGRAM
Scope of Work	One preclinical or clinical study	A group of preclinical or clinical studies for the same molecule (i.e., IND- or NDA-enabling)	Taking a compound from preclinical into early-phase clinical development
Cost Savings	Minimal	Volume-based	Maximum
Time Savings	None	Some	Maximum
Your Level of Oversight Required	High	Moderate	Low

PROACTIVE DRUG DEVELOPMENT SOLUTION

How We Communicate—Tell Us Once™

Tell Us Once™ is Altasciences' commitment to communication. Ask Albert is the proprietary database behind the commitment, fueling integration and facilitating information-sharing across departments.

A.T.L.A.S.™

How We Bring Your Program to Life

Using our **A.T.L.A.S.** framework, your project manager proactively identifies and mitigates risks, seamlessly aligning CRO and CDMO services to keep your program moving forward.

- Customized roadmap for each drug development program
- Single centralized scheduling system
- Active timeline management

Altasciences' integrated approach to project management is a key element of our Proactive Drug Development solution, streamlining CRO/CDMO services to reduce complexities, mitigate risk, condense timelines, and enable cost savings.
